

ARMOR and IIMAK  
are joining forces to offer  
the best in thermal transfer

**It's about synergies.**

We already share a commitment to people, quality of service and technological prowess. Now we are combining our expertise to guarantee even higher standards of reliable traceability.

**It's about proximity.**

Moving forward together, we will cement our position as an industrial leader worldwide, with production sites in the Americas, Europe, Asia and Africa. Always more agile, more present and aligned with our customers.

**It's about relationships.**

Together, we continue charting the same path: the one expected each day by our employees and our customers. Fully committed to sharing what we do best, with confidence, for many years to come.

The journey continues. A new chapter is beginning.

Keep rolling.
